Launch | Cabinet War Rooms, London | 28 October 2010

Sponsored by:

Faculties & Services:

Neuro-musculoskeletal

Faculty

Sarah Bazin
and
Richard Brown

Faculty: Neuro-musculoskeletal

MISSION:

To develop, promote and support an **integrated approach to the care and management of neuromusculoskeletal disorders**, recognising that care will involve a **multidisciplinary approach** which will seek to empower patients in the decision-making process and place them at the centre of **effective care delivery**.

What do we mean by Neuromusculoskeletal?

- Disorders of the musculoskeletal system (muscles, joints, bones and ligaments).
- How these disorders impact on nervous system function.
- Incorporates the biopsychosocial model - includes the impact of these disorders on mental and social wellbeing.

Multidisciplinary faculty

- Physiotherapy
- Chiropractic
- Osteopathy
- Primary Care Medicine
- Surgery (Orthopaedic and Neurological)

...Integrating best practice models for optimum patient care...

What service will the faculty provide?

- Database of integrated services
- Multidisciplinary educational courses
- Development of Evidence-Based Care model
- NMSk information database for patients
